Boutique Hotel Campo De' Fiori

“Travelling is a movement of senses in space. When you travel, the rational thought has to free the stream of emotions... They can only open the door for the sensorial memory, the deepest memory and the only one which lives forever. For this reason, we think that:

“Looking is not seeing!”

To look and to see one has to put something special in the glance, which contains, something similar to sensibility and curiosity, that then becomes knowledge, wisdom and culture.

In this seeing, there is the possibility to create image memories of a permanent lived experience.”

Let us help you to achieve one of the biggest pleasures in life: travelling”
